

# EMPOWERING STUDENTS WITH REAL WORLD AI READINESS

"Cultivating next-generation AI leaders through immersive, industry-aligned education and practical innovation."

## Student Training & Internships

Exposure to GenAI, Reinforcement Learning, Computer Vision, and Edge AI

## Teamwork & Creativity

Students collaborate on mini projects, build leadership skills, and present in Demo Day.

## Capstone Projects

Industry-problem aligned capstone themes (e.g., AI in Genomic Wellness, RFQ Automation, Smart Logistics)

## Mini Projects & Hackathons

Themed projects on trending topics: Chatbots, Autonomous Vehicles, IoT + AI

Crafting your destiny, powered by intelligent choices.

# Our 4 - Weeks Journey

## WEEK 1

- Coding & Logic Basics
- Robotics & IoT Kickoff

## WEEK 2

- AI in Daily Life
- IoT + ML Integration

## WEEK 4

- Gen AI for Creativity
- Applied Robotics

## WEEK 3

- Drones & Emerging Tech
- Final Team Project

# Our 10 - Weeks Journey

## WEEK 1

- Kickoff & Coding Foundations
- Python Basics

## WEEK 4

- Introduction to Machine Learning
- Training of algorithms

## WEEK 5

- Robotics Foundation
- Line following robot

## WEEK 2

- Electronics & IoT Basics
- Introduction to sensors & actuators

## WEEK 3

- Smart devices with IoT
- Sensor Integration and its working

## WEEK 6

- Generative AI & Creativity
- How AI can generate and the workings behind it.

## WEEK 7

- Applied AI & IoT
- Real-world problem solving with IoT & AI

## WEEK 10

- Team project and demo day

## WEEK 9

- Build your own assistant
- Basics of speech recognition and NLP

# Our 16 - Weeks Journey

## WEEK 1

- Kickoff & Coding Foundations
- Python Basics

## WEEK 4

- Smart IoT devices
- Plant watering system

## WEEK 2

- Electronics Starter
- Introduction to sensors & actuators

## WEEK 3

- Python coding + Hardware

## WEEK 5

- Intro to AI & ML
- Everyday AI & Examples

## WEEK 6

- Robotics Basics
- Motors, Sensors and controllers

## WEEK 8

- Creative AI
- Gen AI introduction

## WEEK 7

- IoT Applications
- Cloud connectivity basics

## WEEK 9

- ML in Action
- Basics of classification and regression

## WEEK 10

- Robotics expansion
- Line following robot

## WEEK 12

- AI + IoT
- Emotion recognition and smart light control

## WEEK 11

- How chatbots work
- Make your own chat assistant

## WEEK 13

- Drone parts, safety & use cases
- Fly a virtual drone

## WEEK 14

- Drone assembly & programming
- Test flight

## WEEK 16

- Team project & demo day

## WEEK 15

- Voice recognition with python
- Build your custom voice chat bot
